STRATEGIC DIFFERENTIATORS: WHAT MAKES US DIFFERENT

- Completely unique approach to sourcing virtually unlimited raw cannabis flower at the lowest-cost anywhere in America
- "Captive" distribution: unique capabilities in upstream logistics makes us a partner of choice for California retailers
- Scale and automation driving cost-leadership: we use forklifts to move our weed
- Lowell Smokes: a viral brand that is proving its ability to successfully enter and dominate new markets
- A plan to win, not participate

BRINGING SCALE TO AN EXTREMELY FRAGMENTED MARKET

CULTIVATION

CULTIVATION STRATEGY

* Sourcing via Lowell Farm Services and our own captive cultivation (which

generates approximately 10k lbs of finished flower every quarter)

- ✗ Strain diversification and leadership
- ✤ Cost through economies of scale
- 🗶 Quality leadership under a team of award-winning growers
- ≯ Develop portfolio of facilities that each have sufficient scale

LOWELL FARM SERVICES (LFS)

- Commissioned in July of 2021, LFS is a "midstream processing" service for local growers in the most fertile environment in America
- Facility is initially commissioned to process approximately 250,000 pounds of finished flower annually from diverse growers in the fertile Salinas Valley and surrounding areas
- Processing is a massive pain-point in California cannabis with complicated building-codes and facility requirements that are expensive to accommodate and difficult to staff
- Centralized services allows large-scale automation to give growers the best results for their harvests
- LFS is a unique service without any peers in Northern California

"We are commissioning LFS to answer a pressing need in the market for which we see no other solution in sight. We seek to <u>service</u> the massive and fast-growing cannabis cultivation industry in California, <u>not</u> to compete with it" said Chairman George Allen, "large-scale processing and automation are the missing pieces that will make California cannabis dominant in this exciting new frontier of agriculture."

SEVERAL DEMAND-DRIVERS POWER OUR FUTURE

- California: Grows an estimated 17 million pounds of cannabis annually, nearly 60% of total American supply
- Monterey County: With 4.1 million square feet, it is the third largest county in the state poised for explosive growth with recent expansion ordinances that are welcoming to large-scale cannabis
- Adjacent San Benito County: Previously closed to cannabis cultivation, opening with multiple operations pending approval
- Santa Cruz County: Dozens of outdoor operations and greenhouses

Monterey is the third highest county in California for agricultural output and adjacent to the other four counties that make up the top-five

LOWELL FARMS: WHERE GREAT WEED GROWS

- 🖄 225,000 sq. ft. retrofitted greenhouse in Monterey County, CA
- 💥 Facilities upgrades allow us to improve output
- ★ Targeted levels of 10,000+ lbs of flowers every quarter
